

Common District Model (CDM) - Expanded - 12/31/07

Introduction: The information below is an outline of the "Common District Model". It describes the data tables your SU would have to create and/or extract in order to fully meet the goals of Option #1. If you are considering Option #2, you will want to focus on the Local Assessment objects only.

Acceptable data: Data should come in comma-delimited format with double-quote text qualifiers on text. Numeric fields can be passed in as numeric.

File Organization: For each type of file, one file should be sent for each academic year. For instance, one Student file should be sent for 2003-2004 and another for 2004-2005.

File Naming Conventions (SU/SD): After school files are consolidated, files should be named with the following format for SU/SD: <base name>_<start year>_<end year>.txt]

Example: *L_Student_2001_2002.txt* would be the Student file that contains data for the entire 2001-2002 school year for one SU/SD.

L_SAT9, L_SAT10 & L_TERRANOVA

SAT-9, SAT-10 and TerraNova files may be submitted as fixed-field ASCII .txt or .dat files as received from the test publishers. VDC staff will work with local SU/SD staff to do any additional preparation necessary for processing.

If districts have this data in other formats, VDC staff will work with you to process the data using one of the generic assessment objects (L_Assessment_1, L_Assessment_2, etc.)
